Dear Sirs,

we have tested the FuelSaver during a period of 21 months in 6 different buses like Citaro, MAN, Setra and have seen savings between 7 % and 11 %.

In 2010 we decided to implement the FuelSaver in all our vehicles including 130 buses (Mercedes Sprinter) and 40 taxis (Mercedes E, Toyota Avensis).

Since implementation we are seeing savings of around 10 % to 15 % in our fleet. (fluctuations due to age of the bus, weight, safety driver, etc...)

We can recommend the FuelSaver for usage in buses. As we also run school buses we experience savings there also.

With kind regards,
